Aveo SafeSelect™

LED-Backlit Fuel Selector Valves

The beautiful SafeSelect™ fuel selector valves from AveoEngineering are the world's first LED-backlit valves to assist the pilot in easily finding the fuel selector in a dark cockpit. Featuring an ergonomic selector handle with detent locking, you get a positive lock in the selected location and there is no slippage of your hand off the handle, easy one-hand operation without having to operate difficult release button to lift at the same time like competitive products.

Produced from 2024 Aluminum with brass and PTFE internals the SafeSelect™ is a quantum leap in selector valves, and unmatched safety features that help the pilot identify the correct position for the lever day or night.

These incredible valves are available in two different series, AveoDirectFlo™ and AveoBiFlo™.

AveoEngineering™

www.aveoengineering.com

AveoDirectFlo™

The DirectFlo™ valves are available in a variety of sizes and faceplate configurations. All come with choice of white, red or blue LED-backlighting colors. These valves permit you to switch multiple tanks of one fuel line and come in 1/4", 3/8" and 1/2" feed sizes.

UL Ultralight Models

Designed for smaller engine ultralight aircraft, 1/4" fuel line valves with 1/8" NPT female threads come with three face plates to choose from.

LS Light Sport Models

Designed for light sport category kit and factory built planes with 3/8" fuel lines. These valves come with choice of fittings which is selected at time of order. There are 7 models selected by faceplate choices of.

EX Experimental Performance Models

Designed for the larger experimental high performance aircraft engines with 1/2" fuel lines, these valves also come with 5 faceplate options

AveoBiFlo™

The BiFlo™ valves are available in a variety three sizes and faceplate configurations. All come with choice of white, red or blue LED-backlighting colors. These double compartment valves permit you to switch two fuel lines simultaneously such as normal with fuel injected engine return needs, or diesel engines, and come in 3/8" and 1/2" feed line sizes.

BiFlo Small - with a 3/8" feed and 1/4" vapor return, with face plate.

BiFlo Medium - with a 3/8" feed and 3/8" return, with face plate

BiFlo Large - with a 1/2" feed and 3/8" return, with face plate.
